

MiDatabank user Bulletin

Adverse Drug Reaction feedback

Welcome to the third edition of the UKMi MiDatabank user bulletin

Latest version 3.2.1.15 (April 2017)

New features available: Keywords can be disabled; facility to show/hide for disabled organisations, locations and individuals; a warning flag if you try to add a duplicate enquirer/individual/organisation; updated warning text in 'Edit organisation' page to prevent users from (incorrectly) completely changing an organisation.

Adverse Drug Reaction reporting feedback - to December 2016

MiDatabank ADR reporting figures from the MHRA (to December 2016) are displayed in the tables below.

- **Table 1** shows **cumulative** figures from 2011 to end of December 2016, totals to June 2016 are shown for comparison,
- **Table 2** ranks centres making two or more reports between June and December 2016.

Highlights:

- 4,163 reports have been made via MiDatabank to 31st December 2016.
- 589 reports made since June to December 2016, a 17 % increase.
- 2,662 (64%) of all MiDatabank reports are classed as serious .
- The top reporting Trust for the fourth consecutive period is University Hospital Aintree who submitted 178 reports from June to December 2016.
- Other centres submitting 20 or more reports were:
 - Northwick Park Hospital (40)
 - Blackpool Victoria Hospital (27)
 - Chorley and South Ribble (24)
 - Countess of Chester Hospital (22).
- 66 trusts made one or more reports between June and December 2016.
- 6 new centres made their first reports between June and December 2016 (highlighted in green in Table 1).
- 131 centres are now actively reporting.

NOTE: the figures in the tables do NOT include reports that have been generated in MiDatabank and emailed to the MHRA, nor do they include reports generated directly via the Yellow Card website.

PDS: Annual feedback on ADR reporting to summer 2017 will be available at the PDS in September.

NEW reporting illicit drugs reactions (RIDR)

Public Health England and the MHRA are piloting a new national system for reporting the effects of new psychoactive substances (NPS). The RIDR form, available at <https://report-illicit-drug-reaction.phe.gov.uk>, is intended to be used by health professionals working in emergency departments, general practice, drug treatment services, sexual health services, mental health services and any other services where staff are coming into contact with people who have developed acute or chronic problems with NPS. The scheme is available for healthcare professionals throughout England, Scotland, Wales, and Northern Ireland.

Table 1

Cumulative totals 2011 to Dec 2016 – New reporting centres in green

	Jun 16	Dec 16	Serious		Jun 16	Dec 16	Serious
